22XF14	6.0	Moderate
22XF18	7.0	Moderate
Hana	6.0	Minimal
Aya	7.0	Moderate

SOYBEAN DESCRIPTION UPDATE

• Old Description: Plant Structure

- 4 'Bushy'
- 36 'Intermediate'

• NEW Descriptions:

- **CANOPY**: 1-9 rating
- **BRANCHING**: 3 descriptors

• WHY?

- Better descriptions for better decisions

• **CANOPY** - speed and ability to close a 30" row in most situations

- 8.0+ closes row with ease. Robust, can't pick out rows. Tabletop beans.
- 7.0 can close a 30" row, but it is slower. Below 7.0: caution on droughty soils
- 6.5 & under, prefer placement in narrower row width.

• *These ratings will be specifically for 30" rows*

• **BRANCHING**

- **Profuse** - Abundant branching. May be medium to long, upright or wide
- **Moderate** - Some branching. Generally shorter to medium branches.
- **Minimal** - Little to no branching. More of a 'stick' bean.
